DETAILED ACTION

1. Applicants canceled claims 1-4 and 8-20.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 5 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Imamura et al (JP 11-023886 and its machine-assisted English translation provided by JPO).

Imamura teaches a photosensitive substance used for manufacturing an optical element, which contains present silicone oligomer of formula (2) (see abstract and claim 6 of English translation). Imamura also teaches the use of a photopolymerization initiator (see [0033] of English translation). Therefore, the prior art teaches present inventions of claims 5 and 6.

Allowable Subject Matter

4. Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. In Imamura, his photosensitive substance is poured or injected into a groove and then optically cured to form a core part. Thus, the reference does not teach or suggest present irradiating step (which requires a mask) and present wet etching step of claim 7.
